"Hi! I'm Jordan. I am here to help guide you through this 'At a Glance Catalogue'. Throughout the catalogue I will give you tips, extra information on our items and let you know about exclusive offers. But first, let me tell you a little bit about Chemical Solutions..."

FAMILY OWNED  
FAMILY OPERATED

Chemical Solutions are a family run, family owned business. Based in Stevenage, Hertfordshire, the company was founded by our extremely smart and good looking father Brendan over 30 years ago (he told me to say that). Specialising in janitorial supplies, Chemical Solutions catered to many businesses in London, Hertfordshire and the surrounding areas. After many years of success, Brendan found that running the business on his own was too much for one person (and his hair) and so my brother Ricky joined the company. With the two of them running the company together, our client base grew and grew until once again my father realised that we needed more help. Rather than hire an experienced sales representative he decided to give myself an opportunity (that and I constantly nagged him to give me the job and promised to make him tea every morning). And here we are now! If that story isn't enough to convince you to buy our products then please spare a thought for me making his tea every morning. Anyway, let's take a look at what we have to offer shall we?

*"Chemical Solutions are one of the most customer centric businesses I have ever come across!"*

Elisabeth Santos

# Sugarcane Products

Here at Chemical Solutions we believe in doing our part for the environment. We work with our manufacturers to ensure that our products are recycled or sustainable so that you don't have to worry about it when purchasing our products. Our sugarcane products are made from bamboo which releases less CO2 and doesn't require pesticides unlike other products made from trees.

# Water Soluble Cleaners

Our water soluble sachets are a fantastic, environmentally friendly addition to our catalogue. These sachets drastically reduce plastic use and allow you to re-use old bottles instead of constantly purchasing new ones. Just one sachet is enough to fill a whole 1 litre bottle, meaning that one box of 20 sachets is the equivalent of 4 x 5 litre bottles.

## Laundry (2-1, Bio & Non Bio)

£10.86

Pack of 20

## Washing Up Sachets

£10.86

Pack of 20

There is no risk of coming into contact with hazardous cleaning liquids. Our sachets work by simply dropping them into a bottle of warm water and shaking.

Fill trigger spray with a small amount of warm water

drop 1 sachet into the trigger spray

Close the lid and shake to dissolve the sachet

Add warm water to the mark

Ready to use

Other medical items are available upon request.

# How is Chemical Solutions Sustainable?

Our water soluble cleaners allow customers to re-use plastic bottles over and over again, ensuring that plastic use/wastage is kept to an absolute minimum. We also provide different coloured lids rather than different coloured bottles to help keep wastage down.

All of Chemical Solutions paper products are made from recycled paper. Our newest range of paper products are made from bamboo which is a much more sustainable source of paper.

Our delivery drivers use the latest in delivery software which allows for completely paper free deliveries.

Chemical Solutions supports other small and medium sized businesses, ensuring that the local economy is boosted and communities are given the opportunity to grow and thrive.

We do our best to make sure that any plastic products that we supply are made from recycled plastic.

Chemical Solutions sponsor many local events and help provide cleaning stations so that event goers can stay as safe as possible during these post Covid times.

# KNOW YOUR COSHH

## Causes skin irritation/eye irritation

A non-corrosive preparation, which through immediate, prolonged or repeated contact with the skin or mucous membrane, can cause inflammation. Products with moderate levels of surfactants. The use of suitable clothing, gloves or eye protection is recommended to avoid contact with skin &/ eyes.

## Harmful if inhaled/swallowed/contact with skin

A preparation which may pose an aspiration toxicity hazard to health, if swallowed & then refluxed into lungs. Products with high levels of kerosene. Avoid any possibility of ingestion.

## Causes severe skin burns and eye damage

A preparation which may destroy living tissue on contact, it may also be Corrosive to certain metals. Products with high levels of caustic soda. Avoid contact with skin & eyes. Wear protective equipment to prevent skin & eye contact (E.g. Overalls/Gloves/Goggles).

## Extremely or highly flammable liquid or vapour.

A liquid preparation having a flash point of less than 23°C. Products with high levels of highly flammable solvents. Keep away from sources of ignition. Keep away from heat/sparks/open flames/hot surfaces – No smoking

## Very toxic to aquatic life

A preparation that if allowed to enter natural water courses would (or may) present a danger to the Aquatic environment. Products with high levels of environmentally hazardous material. Dispose via sewage drains for water soluble products or as hazardous waste by registered contractors. Do not release straight into rivers.

## May intensify fire: oxidiser

A preparation which gives rise to a highly exothermic reaction in contact with other substances, particularly flammable substances. Products that contain an oxidising agent. Keep away from flammable and combustible materials. Store in a cool place away from direct sunlight.
